[@DOITWITHSHOWIT](#)

This guide is designed to guide you through the process of incorporating an animated number counter into your ShowIt website. It offers a straightforward, step-by-step approach that requires no coding expertise. You'll find all the necessary code snippets within this guide, making it as simple as copying and pasting to implement. I've included a [tutorial Instagram Reel](#) for you to watch as you follow along with this guide.

LET'S GET STARTED!

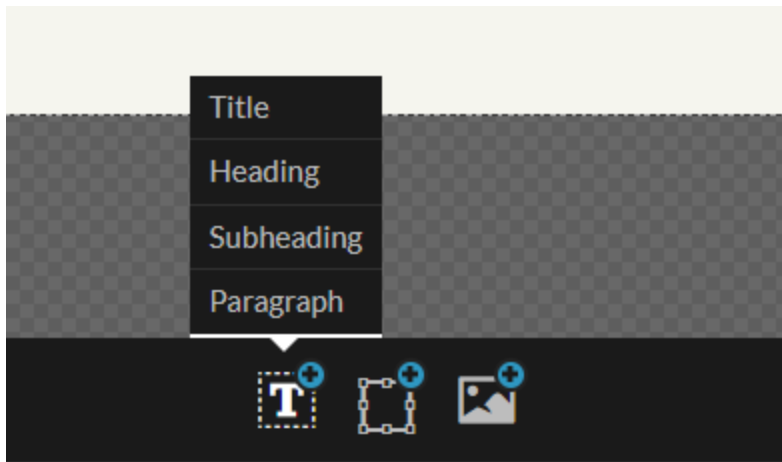

Step 1: Identify the canvas you want to add the gradient effect to:

1. Log In: Start by logging in to your Showit account if you haven't already.
2. Navigate to the page where you intend to position your number counter.
3. Under the Advanced Settings, locate the "CUSTOM HEAD HTML" box, and insert this code snippet:

```
<script
src="https://cdn.jsdelivr.net/gh/Pratik-Khaling/doiwithshowit@b3de4
6260fa246215a80dac809209f74d92c28d0/numcounter.min.js"></script>
```

Step 2: Add the Counter:

1. Add a text box to your canvas. Depending on your preference it can be any of the Title, Heading, Subheading or Paragraph text box.

2. **Alt + Double Click on the text box.** This opens the HTML Editor. Copy and paste the code below inside the text box:

```
<span class="count">50</span>
```

Replace the number “50” inside the code with your desired number

3. Use the Text Style tab on your right hand side to style the text box as you normally do with any other text box in ShowIt
4. Hit Preview and see your counter in action!

Optional: Create More Counters

After successfully adding your first counter, replicate **Step 2** for any additional counters you require, ensuring you modify the counter numbers accordingly.

CRUCIAL TIP*: If you intend to include the counter on a different page, remember to revisit **Step 1** for that specific page too.

Final Thoughts

Congratulations! You've effectively integrated animated number counters into your ShowIt website. This dynamic feature enhances user engagement and visually enriches your site for a more compelling visitor experience.

If you relished the process of customizing your counters, I invite you to connect with me on Instagram [@doitwithshowit](#). I post regularly with creative effects and animations tailored specifically to ShowIt websites.
